

POLICY OF QUALITY, ENVIRONMENTAL PROTECTION, OCCUPATIONAL SAFETY AND HEALTH

We are carrying out the projects of the type Design-Build and we unite the designing, manufacturing and building enterprise. We have a complex approach to each project so that its implementation was as simple as possible for our customer.

We aim to become experts in our field, we have responsible attitude to the work we are doing, we foresee, assess and manage the situation properly, we use the work time rationally to achieve qualitative work result, and we are able to suggest solutions and raise objectives for ourselves.

We are a learning organization – we are studying all the time and help others to improve. We apply the acquired knowledge at work, we are interested in novelties, and we endeavour at performance effectiveness through implementation of new ideas and suggestion of innovative solutions. Our employees are the main factor of quality assurance. We believe in the principle “Perfection has no boundaries”.

We aim at the following:

- to have the requirements of standards ISO 9001, ISO 14001, ISO 45001 understood on all the levels of the organization;
- to comply with the requirements of the standards and legal acts applicable in the countries of activities’ performance and to improve continuously the management system of quality, environmental protection, and occupational health and safety;
- to improve quality of products and services in order to have our capabilities coincided with the customer’s expectations;
- to apply good practice in the field of environmental protection;
- to create healthy and safe work conditions, to remove dangers on time, and to reduce hazard for occupational health and safety;
- to create conditions for employees to get familiar with the made decisions, to provide consultations or clarifications;
- to assign resources for functioning of the management system.
